APPENDIX B

[See rule 9(2)]

Order for the examination of seamen for Certificates of Efficiency as Lifeboatmen

1. The candidates fall in standing in single line with lifejackets facing the boat. One of them is then asked to act as coxswain and to detail the crew to their various stations.

The stroke oarsman takes station abreast the stern post, the bowman abreast the stem and the lowerers opposite the falls.

2. Whilst in this position the candidates should be called out individually and questioned as to their knowledge of the details of the boat, the disengaging gear and the equipment and management of the boat.

3. Candidates may be expected to answer any of the following questions:-

How many oars are there in the boat?

What are the parts of an oar?

How are the oars stowed in the lifeboat?

How many boathooks are there?

How many axes and where kept?

How many plugs and where kept?

How much bread or biscuit should there be in the biscuit tank?

How much water should there be in the water breakers?

How to get water out of breaker?

What is the use of bailers and buckets?

How would you attract attention at night?

Show how to light red lights?

Have you any other means of attracting attention at night?

How long should the lamp burn?

What oil is to be carried?

Name parts of sails?

Which side of a boat do you attach sheet to and to what do you make sheet fast?

Where does the tack of a standing lug make fast?

Where does the tack of a dipping lug make fast?

How would you distinguish parts of sail in the dark?

What is the use of a reef? Tie a reef point.

Describe difference between standing and dipping lugs?

What would you do in the event of having to lower sail in bad weather?

What is a very important thing to remember when handling a boat under sail?

Describe the use of the sea anchor?

Describe the use of an oil bag?

How would you bring a boat head to sea?

Which gripes would you let go first when about to swing a boat out?

Before lowering a boat, what is important to see to?

When a boat is lowered in the water which tackle do you let go first?

If the forward tackle is let go first, what happens if ship has headway?

How would you tell number of people a boat is certified to carry?

What are lifelines for?

What is there in the boat for providing buoyancy?

What are the buoyancy tanks made of?

How would you distinguish the steering oar from the others?

Candidates to name any points of the compass, if asked.

4. *Clear Away.*—On the Coxswain giving the order "Clear away", the boat's covers and spreaders if in place are removed by the combined crew, and the bowman and stroke oarsman get into the boat. The bowman sees that the painter is clear and ready to pass to the deck, and also sees that the forward lifeline is clear. The stroke oarsman sees the after lifeline clear, ships the plug and prepares to ship the rudder or steering oar. Both these men should see that oars and boat hooks are clear and ready for use. The lowerers see that the falls are taut and properly belayed and clear for running. Other members, as detailed, release the gripes (outboard gripes first) and see that the chocks and gripes are clear, and the boat ready for turning out. The crew then return to their former positions, with the exception of the bowman and stroke oarsman.

5. *Swing out.*—At this order the boat is swung out as quickly as possible and brought square to the ship's side and the guys secured. The painter is passed forward to a suitable position and the rudder or steering oar shipped. Before the boat is lowered, the operation of swinging out from the choked and gripped position (there is no reason to deal with covers or spreaders again) should be repeated several times. A different man should act as coxswain each time, and the positions of the other candidates should be varied.

6. *Lower Away.*—At this order, the boat is lowered, the looms of the oars being used for fending off the ship's side, care being taken that the boat is kept as near as possible on an even keel. When the boat is waterborne the remainder of the crew will take their places in the boat. The oarsmen will unhook the falls, ship outboard crutches, and toss their oars. The bowman either hauls in or slips the painter, and with the stroke oarsman shoves the boat away from the ship's side with boat hook or oar. Each member of the crew should take part in the actual lowering of the boat in turn. This can be arranged by lowering in stages.

7. *Still and Carry on.*—The order "Still" is given when, through some misunderstanding or accident, or for the purpose of instruction it is necessary to suspend operations. At this order each man stops what he is doing, retaining his position and remaining silent, and if the order is given whilst the boat is being lowered the lowerers immediately take an extra turn of the falls or belay them. At the order "Carry on", operations are resumed.

8. *Practice Afloat.*—Every candidate should be capable of descending unaided into a boat alongside the ship by means of a side ladder suspended over the ship's side.

When the boat is afloat, each member of the crew should be required to take turn in rowing, steering and giving orders also in assisting to set the sail, float the sea anchor and to bring the boat alongside.

9. *Order for leaving the ship's side.*—The order is "Let Go the Painter" "SHOVE off Forward".

NOTE.—When the boat is manned, see that the crew are sitting square on the thwarts facing aft.

"Toss Oars".—Oars vertical, blades fore and aft.

"Down Oars".

"Give Way Together".

10. *Orders for a Lifeboat under way under Oars.*—Candidates are required to take charge and act as Coxswain, giving the necessary orders for turning short round to port or starboard.

To turn boat short round, head to port:—

"Back Water Port".

"Give Way Starboard".

When round far enough, give the order:—

"Give Way Together" or—

"Oars".—At this order the crew take one more stroke and come to position "Oars", sitting erect, facing square aft, oars horizontal blades fore and aft and in line with gunwale.

To turn boat short round, head to starboard:—

"Back Water Starboard".

"Give Way Port".—When round far enough, give the order—

"Give Way Together" or—

11. *Orders when coming alongside.*—When about 60 yards off, give the order "Bow". The bowman tosses and boats his oar and stands by with boathook.

"Way Enough".—Crew pull one more stroke after this order and then toss oars together.

"Boat your oars".—Lay oars inboard, blades forward, and unship crutches.

With boat alongside, see all square, leaving two men in boat to hook on falls.
